

Battery Care

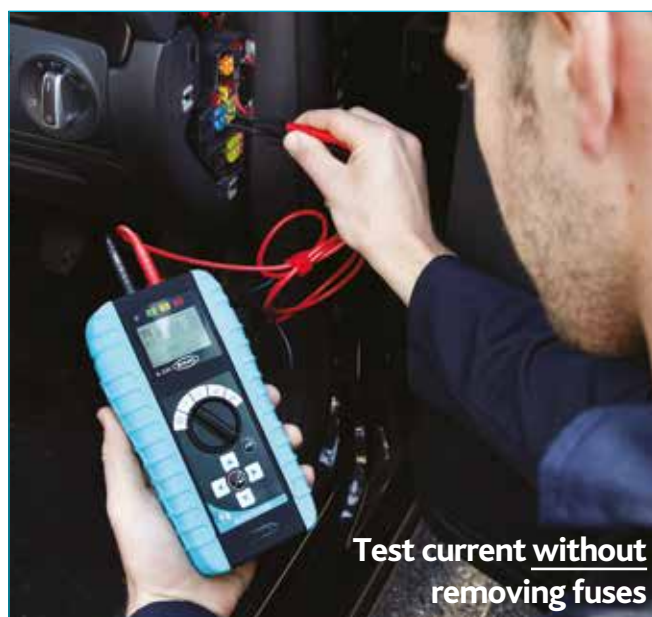

Multi-Function Automotive Tester 0-50V, 80A F25

Multi-Function Automotive Tester 0-50V, 80A

- Auto ranging 6/12/24V battery testing with traffic light LED result
- Rapid current testing up to 80A without removing fuses
- Current adapter for in-line current testing
- 12/24V Starter Test checks battery during engine cranking
- Normal and Smart 12/24V alternator test for checking vehicle charging system
- Frequency and duty cycle settings aid testing of sensors
- Continuity and resistance modes for locating wiring faults
- Robust storage case

Specifications

Specifications	UK/Euro
Part No	RMM500
Voltage test	6/12/24 Volt
Starter test	12/24 Volt
Alternator test	12/24 Volt
Voltage range	0 - 50V DC \pm 2%
Current (Parallel)	0 - 80A \pm 3% 3A - 30A (Mini fuse) 3A - 40A (Standard fuse) 20A - 80A (Maxi fuse)
Current (In-line)	1 - 999mA \pm 1% (Low range) 1 - 30A \pm 2% (High range)
Resistance	0 - 1M Ω \pm 2%
Frequency	1Hz - 20KHz \pm 1Hz
Continuity	0 - 500 Ω
Working Temp	0 - 50°C
Batteries	3 x AA (not included)
Pack dimensions	260(H) x 360(W) x 98(D)
Pack qty	8 x 1
Barcode	5055175240367

Test current without removing fuses

Ring Automotive Limited,
